**How Do I Integrate PayPal With AWeber?**

You can easily integrate PayPal with AWeber, using our [email parser feature](#) to automatically add buyers to a customer list in your account!

This type of integration is available only for shopping cart buttons. For recurring payment or subscription products, a web form will need to be placed somewhere in the order process instead.

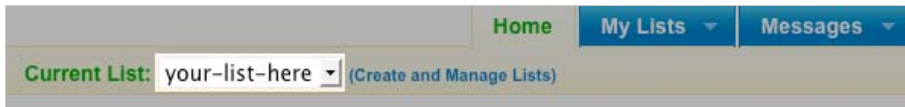

**Would you like to...**

- [Print this page](#)
  - [Ask a question](#)
  - [Subscribe me](#)
  - [Add to favorites](#)
- [\[See My Favorites\]](#)

**Step by Step Instructions**

First, you will need to get your list's email address. This email address is used by PayPal to let your account know when someone makes a purchase.

When logged into your account, on the left side of your page, you'll see a dropdown menu labeled **Current List**.

Your list name appears in the box. Make sure you are in the right list, then simply add **@aweber.com** to the end of your listname to get your list's email address. Note this down for later.

Next, you should turn on the PayPal parser in this list. The parser is what does the work of "reading" the messages that PayPal sends to your list and adds people to your list after they make a purchase!

To do this, first go to the Email Parser page under the My Lists tab.

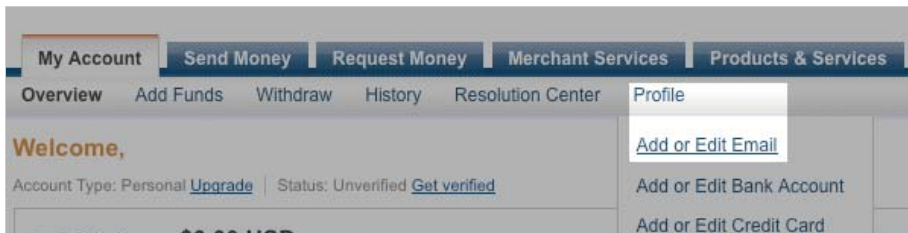

Now just scroll down the page until you find the check box labeled "PayPal Orders" and click on it.

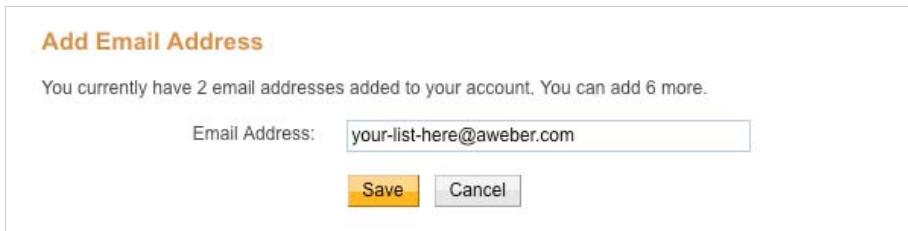

Now, you will add your list's email address (that you got in step 1) to your PayPal account. This will allow PayPal to send the message to your list.

To do this, first log into your PayPal account, and make sure that you are working under the **My Account** tab. Then, on the right, click on Profile, then Add or Edit Email.

On this page, click the **Add** button to add a new address. Just enter your list's address, then click the Save button.

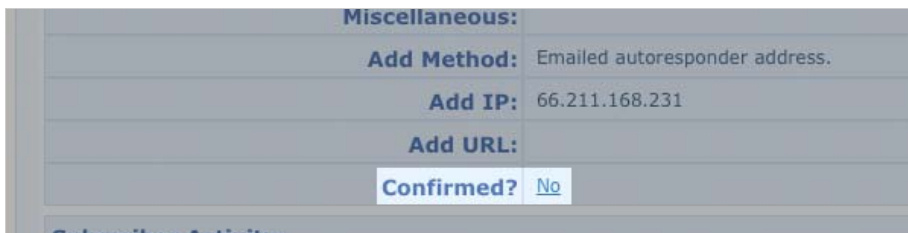

Now that the address has been added, PayPal requires that you confirm that you are the owner of that address. To do this, you'll need to go back into your AWeber account, and make sure that you are working under the **Home** tab. Once there, click on Search Subscribers to the right of the page, and search for "Email" "contains" "paypal".

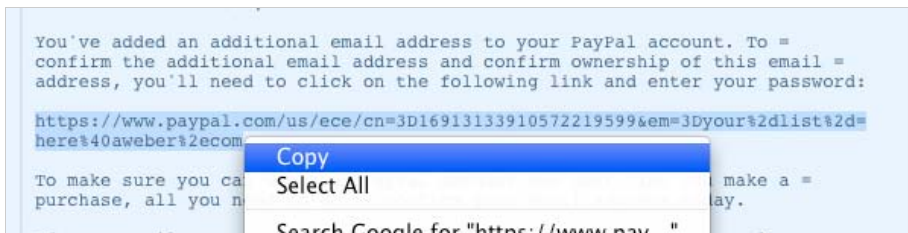

This should pull up the "service@paypal.com" address (Note: if this does not work, you may need to wait a few minutes for that to show up in your account. Also, if you are setting up parsers in multiple lists, make sure that the correct list appears under the "Listname" column!). Click on the email address to access more information.

Stop	Listname	Ad Tracking	Last Follow Up	Name	Email (Click for more info)
	your-list-here		Confirmation		<a href="mailto:service@paypal.com">service@paypal.com</a>

Now, further down on the page, find the line that reads "Confirmed?" and click the "No" link.

This will provide you the text of the email that PayPal sent to your list. Look for the URL that comes after "click the following link and insert your password." Highlight the whole link (keep in mind it might take up more than one line), and copy it.

The link that PayPal sends will not work right away, as it will most likely contain some invalid characters. Luckily, we have a tool that you can use to clean that link up. Just paste the URL that you copied in the previous step into the box below, then click the "Convert Link" button.

Paste in the box below:

Click below to convert the link.

Convert Link

Once you click that link, or copy and paste it to your browser, you will be taken to a page that prompts you for your password. Simply enter your password and click the Confirm button to activate your list's email address!

**Enter Password**

1 Choose Account Type   2 Enter Information   **3 Confirm**   4 Done

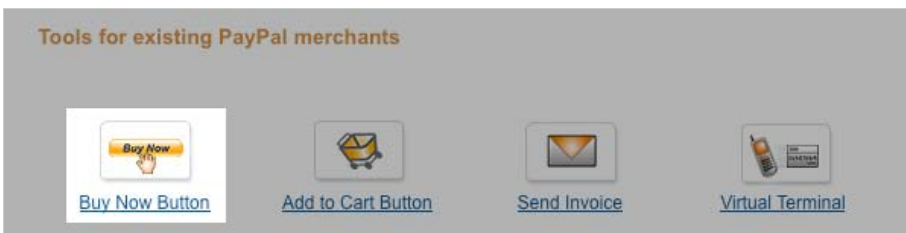

Please enter your PayPal password to confirm your email address.

Password:  [Forgot your password?](#)

**Confirm**

Note: If this method does not work for you, take a look at our [alternate instructions](#) at the bottom of the page.

Now all that you need to do is create your Buy Now Button. To do this, make sure that you are under the **Merchant Services** tab in your PayPal account, and click the link to create a Buy Now Button.

After setting up the item name and price as normal, simply scroll down and make sure that you have selected "Use my primary email address" and chosen your list's email address from the drop down menu.

**Merchant account IDs** [Learn more](#)

Use my secure merchant account ID

Use my primary email address

▶ Step 2: Track inventory, profit & loss (optional)

After you are done setting up your button, just hit the **Create Button** button as normal.

That's it! Now you can use the code that PayPal gives you to place the button wherever you would like, and anyone who makes a purchase using it will be automatically added to your list. If you have multiple products, and want customers added to a different list for each product, just follow the steps above for each button that you would like to create.

**If The Steps Above Didn't Work**

Go back into your AWeber account, and make sure that you are working under the **Home** tab.

Once there, click on Search Subscribers to the right of the page, and search for "Email" "contains" "paypal".

This should pull up the "service@paypal.com" address (Note: if this does not work, you may need to wait a few minutes for that to show up in your account. Also, if you are setting up parsers in multiple lists, make sure that the correct list appears under the "Listname" column!). Click on the email

address to access more information.

Stop	Listname	Ad Tracking	Last Follow Up	Name	Email (Click for more info)
<input type="checkbox"/>	your-list-here		Confirmation		<a href="mailto:service@paypal.com">service@paypal.com</a>

Now, further down on the page, find the line that reads "Confirmed?" and click the "No" link.

Miscellaneous:	
<b>Add Method:</b>	Emailed autoresponder address.
<b>Add IP:</b>	66.211.168.231
<b>Add URL:</b>	
<b>Confirmed?</b>	<a href="#">No</a>

This time, look for the 20 digit confirmation number that appears in the message, and copy it.

If your email program has problems with hypertext links, you may also confirm your email address by logging in to your PayPal account. Click the =22Confirm email=22 link and then enter the following confirmation number:

0604-8404-0096-9660-3907
